#### A "leadership" preserved in all countries of presence

The incumbent telecommunications provider of Senegal (SONATEL), a subsidiary of the Orange Group, is a key player in West Africa. The company is active in Fixed Line telephony, Mobile, Internet Services, Mobile Money segments as well as in new services related to the use of Data. At the end of 2022, Sonatel maintains a leading position in the countries of presence:

- Senegal : incumbent operator with a market share of 59% and a Mobile penetration rate of 120%. Sonatel's positioning in the Mobile Money segment has been impacted by the arrival of the new entrant Wave. The latter has caused an 80% drop in price in this segment;
- Mali : market leader with a market share of 53% and a Mobile penetration rate of 106%. The operator experienced a slight decline in its market share of -0.5 pt in 2022;
- Guinea : market leader with 66% market share and 102% Mobile penetration rate. The operator was able to improve its market share by +6 pts in 2022;
- Guinea-Bissau : market leader with a market share of 61% and a Mobile penetration rate of 113%. The operator improved its market share by +2 pts in 2022;
- Sierra Leone : despite strong competition, Sonatel maintains its leading status with a market share of 52%, down -3 pts in 2022. Taking into account a Mobile penetration rate of 89%, this market has a higher growth potential.

#### An appreciable resilience in a more constraining environment

In a restrictive inflationary and regulatory context, we have revised Sonatel's annual revenue growth profile to +5.4% during the 2022-2025E period against +7.3% over 2019-2022. Mobile Data remains the main growth driver with an AAGR of +12.3% and a revenue contribution of 37.0% over the same period.

The ability to defend an EBITDA margin above 40.0%, is supported by the new cost efficiency plan. This would allow Sonatel to maintain a profit capacity of around FCFA 260 Bn over the next two years. Thus, the Group would have an interesting leeway in terms of its payout in order to return to a DPS above FCFA 1,500.

#### Sonatel stock : attractive entry points for a MT investment horizon

Based on our conservative valuation assumptions, we come out with a target price for Sonatel stock of **FCFA 19,674**, offering an upside of +25%<sup>(1)</sup>. During the 2023E-2025E period, the stock displays one of the best "P/E-D/Y" pairs within the BRVM, i.e. 5.9x and 9.2% respectively.

#### Conf-call Management - 06/12/2023

Following our conference call with the Management of Sonatel Group, we came away with a reassuring feeling.

Insurance points :

- The sustainability of the Data Mobile growth over the MT;
- The ability to defend an EBITDA margin above 40.0% thanks to the optimization of  $IE^{(2)}$ .

#### Risk factors :

- Lack of visibility on future impacts of regulatory pressures;
- Rapid evolution of competition requiring a certain flexibility of the business model.

<sup>(1)</sup> Price as of 07/12/2023 : FCFA 15,700 ; <sup>(2)</sup> IE: Indirect expenses

## TELECOM BRVM

#### Positive business momentum in 2022, ... a reassuring first quarter of 2023

Sonatel confirms the resumption of its post-Covid activity with an increase in its revenues of +9.0% in 2022 versus +10.7% in 2021. This sustainability of growth reflects the resilience of the operator's business model within an unfavorable context. This is marked by intense competition, inflationary environment which weighs on telecommunications spending and increasingly regulatory pressures.

Revenue growth in 2022 is still driven by the Mobile Data, which posted growth of +23.5%. With a weight of 30% in revenue, Data Mobile contributes more than 70% to the growth of consolidated revenues in 2022.

Thanks to competitive offers on the Very High Speed segments (LTE/FDD/TDD and Fiber), Sonatel was able to limit the drop in Orange Money's of -9.3% revenue in 2022 and the natural decline in international activity. This is penalized by the accelerated development of VoIP<sup>(1)</sup> applications at the expense of traditional Mobile Voice communication.

Under the effect of the "good" control of costs, operating income shows growth of +9.4% in 2022, slightly higher than that of revenues (+9.0%). It should be noted that the change in expenses is mainly driven by infrastructure maintenance and network development. Under these conditions, the EBITDA margin and the operating margin have stabilized in 2022 at 44.2% and 29.6% respectively. At the same time, the relative improvement in the financial result of FCFA +9.4 Bn allowed the increase in net income of +11.8% to stand at FCFA 236 Bn in 2022.

The Group's achievements in Q1-23 confirm the solidity of its growth profile through an increase in its revenues of +9.8%. In addition, we believe that Mobile Money activity should experience a visible rebound in 2023, after a -9.3% drop in 2022. This scenario is supported by Management's ability to readjust its competitive strategy regarding this segment from 2023E.

#### SONATEL: 2022R CONSOLIDATED ANNUAL RESULTS VS. Q1-23 RESULTS

#### A proven ability to defend a normative profit of FCFA 260 Bn

With a resilient revenue growth profile (i.e. +5.4% per year) and taking into account the margins available to Management in terms of optimizing its costs, we believe that Sonatel would be able to defend an average earning power of FCFA 260 Bn during the 2023E-2025E period.

Our scenario over the 2022-2025E period is based on the following assumptions:

#### ⇒ 5.4% AAGR of revenue driven by Mobile Data momentum

In a challenging environment, we retain an AAGR of +5.4% against +7.3% over the period 2019-2022. This growth profile is mainly driven by the **Mobile Data** activity, whose target AAGR would be +12.3% with a contribution to revenues that would increase from 31% to 37% over the same period. The **Mobile** business should maintain a low growth rate (i.e. an AAGR of +1.0%) with an average revenue contribution of 38%. **Mobile Money** should remain under pressure with less sustained growth of +3.0% on average per year. The **Fixed Broadband** activity should continue its momentum with an AAGR of +12.7%. Nevertheless, its contribution to revenues remains relatively limited at 5% over the same period.

#### ⇒ Preservation of an EBITDA margin around 43.5% against 44% historically

Taking into account the sustainability of the inflationary context within West African countries, we have retained an AAGR for operating costs of 5.7% over the forecast period. In addition, Management would have some leeway through an efficiency plan related to expenses. It should be highlighted that the maintenance costs of infrastructures and the network would follow a normative progression.

In the end, the EBITDA margin would stand above 43.5% over the forecast period against an average of 44.0% between 2020 and 2022.

#### ⇒ A sustained investment effort through a target CAPEX/Revenue ratio of 19.0%

In a competitive environment, Sonatel would continue its investment effort. According to the Management, the target CAPEX/Revenue ratio should oscillate between 16.0 and 18.0% over the 2022-2025E period. As a precautionary measure, we have retained a CAPEX/Revenue ratio of 19.0% due to the efforts required by both the competitive and the regulatory context.

The planned investments mainly concern the improvement of the quality of services through the continuous development of the network as well as the construction of new offices in the countries of presence in order to mark the anchoring of the Group within West Africa.

#### ⇒ An estimated impact of FCFA 30 Bn related to the "Orange Mali-Remacotem" conflict

Following the "answering machine billing" conflict between Remacotem<sup>(1)</sup> and telecom operators in Mali, the cost related to Orange Mali could reach, according to our estimates, FCFA 30 Bn. We have therefore included this amount in the 2023E financial statements of the parent company.

#### SONATEL: CONSOLIDATED FORECAST P&L STATEMENT 2022R-2025E

(FCFA BN)	2022	2023E	2024E	2025E	VAR 23/22	AAGR 22-25E

## TELECOM BRVM

#### A fundamental valuation, offering a stock's upside of +25%

At the end of our valuation exercise, we opted for the DCF method. Based on the assumptions made, we arrive at an EV of FCFA 2,111 BN for Sonatel.

By deducting the net debt at the end of 2022 (i.e. FCFA 144 Bn), we come out with a fundamental value per share of FCFA 19,674 in comparison to a stock price of FCFA 15,700 on July 12<sup>th</sup> 2023. **Thus, we recommend Sonatel stock for BUY due to a potential upside of +25% over the MT.** 

The main valuation assumptions are as follows:

- +5.4% AAGR of revenue over 2022-2025E. Beyond that, we retain a growth rate of +2.0%/year;
- An average EBITDA margin of 43.7% over 2023E-2025E. Beyond that, this margin should be normalize at 41.5%;
- A CAPEX/Revenue ratio of 19.0% on average over 2023E-2025E. Beyond that, we retain a target level of 18.0%;
- A stable FCF 2023E due to an outflow of FCFA -30 Bn (impact of Orange Mali-Remacotem" conflict);
- A WACC of 13.1% taking into account a target financial leverage of 25% and a specific risk premium of 2.0% applied by foreign investors vis-à-vis the BRVM Stock Exchange (AGR ERP Survey Study - WAEMU Region);
- A perpetual rate of 3.0% justifying a contribution of the terminal value of 34.0% to the total EV.

#### SONATEL: FREE CASH-FLOW STATEMENT 2022R-2032E

INDICATORS (FCFA BN)	2022R	2023E	2024E	2025E	AVERAGE 26E-32E

Change	-16.8%	+2.0%	+23.6%	+3.8%	+1.8%
FCF margin	16.3%	13.3%	15.6%	15.4%	14.5%

#### A stock offering one of the best "P/E-D/Y" pairs within the BRVM

Today, Sonatel offers clear "visibility" and demonstrates its "ability" to defend a recurring profit around FCFA 260 Bn. During the 2023E-2025E period, the stock trades at a recurring P/E of 5.9x, i.e. a discount of 43% compared to its LT P/E<sup>1</sup> (10.4x) and 26% compared to the current P/E of the BRVM (8.0x).

At the same time, we believe that Sonatel would maintain a generous dividend policy supported by an interesting payout margin. While maintaining the payout at 60%, Sonatel would be able to offer a normative DPS between 1,500 and FCFA 1,600 over the 2024E-2025E period, equivalent to an attractive D/Y of 9.9%.
